

WHAT-IF SCENARIO ANALYSIS

Valencia Operations · Sensitivity · 2026-08-17

THE REQUEST

Asked: "Cut marketing spend by 20 percent"

Parsed as: You want to reduce Marketing Spend by 20 percent.

EBIT moves €+76,800 (+14.2%), from €542,191 to €618,991 over the forecast horizon.

BASE VERSUS SCENARIO

Line	Base	Scenario	Change	%
Revenue	8,490,872	8,490,872	+0	+0.0%
COGS	3,549,185	3,549,185	+0	+0.0%
Gross Profit	4,941,688	4,941,688	+0	+0.0%
Personnel Cost	1,732,250	1,732,250	+0	+0.0%
Marketing Spend	534,000	457,200	-76,800	-14.4%
IT Infrastructure	270,000	270,000	+0	+0.0%
R&D Expense	1,863,247	1,863,247	+0	+0.0%
Total OpEx	4,399,497	4,322,697	-76,800	-1.7%
Operating Profit (EBIT)	542,191	618,991	+76,800	+14.2%

ANALYSIS

Key takeaways

- EBIT changes by +76,800 (+14.2%), from 542,191 to 618,991.
- Lines that moved: Marketing Spend. Lines held flat: Revenue, COGS, Personnel Cost, IT Infrastructure, R&D Expense.

This is a sensitivity analysis in which a single driver, Marketing Spend, was reduced by 20 percent from its base level, with all other inputs held unchanged.

The most important result is the EBIT improvement. Cutting marketing spend by 20 percent adds 76,800 euros to EBIT over the forecast horizon, lifting it from 542,191 to 618,991 euros, a gain of roughly 14 percent on the base EBIT figure. Revenue remains flat at 8,490,872 euros in both cases, so the entire benefit flows through as a direct cost reduction rather than as any change in the top line.

There is a material limitation to note. The model treats revenue as driven by its own seasonal trend, meaning the reduction in marketing spend has no effect on customer acquisition or retention and therefore no effect on Revenue. In practice, lower marketing investment would very likely weigh on future revenue to some degree, so the 76,800 euro EBIT benefit shown here should be treated as an upper-bound estimate. A fuller scenario that also modelled the revenue drag from reduced marketing activity would give a more conservative and arguably more realistic picture of the net impact.

Assumptions held constant. Marketing and customer changes do not flow through to Revenue, which is modelled on its own seasonal trend, so the revenue line is unchanged in this scenario.
